sustainability of agriculture

· FARMERS are the BACK BONES OF INDIA

Unspoken heroes of the nation who" produce harvest and provide food for us "

climate change has negatively influenced farming activities by early or delayed

information,peers,networks and relationships.

R.PRIYADHARSHINI
INDIAN'S AGRICULTURAL CROP

India is am;ong the top three global producers of many crops,including wheat,rice,pulses,etc.,

The goal is to improve their working conditions and productivity while avoiding production loses due to bad climate conditions.

Drought,insects,crop diseases,and heat stress were there main concerns regarding adverse impacts of climate change.

Floods,heat wavesand cold waves ,hail stroms and cyclones these are the farmers face multiple climate risks..
